12 manual.

13 (b) Annual valuation.--The commissioner shall annually  
14 value, or cause to be valued, the reserve liabilities for all  
15 outstanding life insurance policies and annuity and pure  
16 endowment contracts of each company doing business in this  
17 Commonwealth. The commissioner may certify the amount of  
18 reserves.

19 (c) Calculation.--In calculating reserves, the commissioner  
20 may use group methods and approximate averages for fractions of  
21 a year or otherwise.

22 (d) Other jurisdictions.--In lieu of the valuation of the  
23 reserves required of a foreign or alien company, the  
24 commissioner may accept a valuation made, or caused to be made,  
25 by the insurance supervisory official of any state or other  
26 jurisdiction when the valuation complies with the minimum  
27 standard provided in this chapter.

28 (e) Minimum standard.--The minimum standard for the  
29 valuation of policies and contracts issued prior to the  
30 operative date of section 410A of The Insurance Company Law of

1 1921 shall be as follows:

2 (1) The net value of all outstanding policies of life

4 shall be computed upon the basis of the American experience  
5 table of mortality, with interest at not less than 4.5% and  
6 not more than 6% per year.

7 (2) The net value of all outstanding policies, issued  
8 between January 1, 1890, and January 1, 1903, shall be  
9 computed on the combined experience or actuaries' table of  
10 mortality, with interest at 4% per year.

11 (3) The net value of all outstanding policies of life  
12 insurance, issued on and after January 1, 1903, shall be  
13 computed on the American experience table of mortality, with  
14 interest at 3.5% per year, but a company may value its group  
15 term insurance policies, under which premium rates are not  
16 guaranteed for a period in excess of five years, according to  
17 the American men ultimate table of mortality, with interest  
18 at 3.5% per year.

19 (4) The net value of all policies of life insurance,  
20 issued on and after January 1, 1921, where the premiums are  
21 payable monthly or more frequently, shall be computed  
22 according to the American experience table of mortality, with  
23 interest at 3.5% per year, but a company may voluntarily  
24 value its industrial policies according to the standard  
25 industrial mortality table, with interest at 3.5% per year.

26 (5) The net value of a policy at any time shall be taken  
27 to be the single net premium which will, at that time, affect  
28 the insurance, less the value at that time of the future net  
29 premiums called for by the table of mortality and rate of  
30 interest designated.

1           (6) Except as otherwise provided in sections 7116(a)  
2 (relating to computation of minimum standard for annuities)  
3 and 7117(a) (relating to computation of minimum standard by  
4 calendar year of issue) for group annuity and pure endowment  
5 contracts, the legal minimum standard for valuation of  
6 annuities issued after January 1, 1912, shall be computed  
7 according to McClintock's table of mortality among  
8 annuitants, with interest at 3.5% per year, but the following  
9 shall apply:

10           (i) For annuities and pure endowments purchased  
11 under group annuity and pure endowment contracts, the  
12 legal minimum standard may, at the option of the company,  
13 be computed according to the 1971 Group Annuity Mortality  
14 Table or any modification of this table approved by the  
15 commissioner, with interest at 5% per year.

16           (ii) Annuities deferred 10 or more years, and  
17 written in connection with life or term insurance, shall  
18 be valued upon the same mortality table from which the  
19 consideration or premiums were computed, with interest at  
20 not more than 3.5% per year.

21           (7) At any time and under any of its policies of life  
22 insurance, a company may elect to reserve on the following,  
23 with its obligations under these policies to be valued  
24 accordingly:

25           (i) the American experience table of mortality with  
26 a lower rate of interest, but at a rate not less than 2%  
27 per year; or

28           (ii) the American men ultimate table of mortality,  
29 with any modification and extension below 20 years of age  
30 as may be approved by the commissioner, with interest at

1 a rate not less than 2% nor more than 3.5% per year.

2 (8) On or after the operative date of section 410A of  
3 The Insurance Company Law of 1921, reserves for any policies  
4 or contracts may be calculated, at the option of the company,  
5 according to any standard which produces greater aggregate  
6 reserves for all these policies or contracts than the  
7 standard in use by the company immediately prior to the  
8 exercise of the option.

9 (9) With the approval of the commissioner, a company  
10 that adopts a standard under paragraph (8) may adopt a lower  
11 standard of valuation for any policies or contracts if that  
12 lower standard is not lower than:

13 (i) the minimum reserves provided under this  
14 section;

15 (ii) the standard specified in the policies or  
16 contracts; or

2 reserves required of a foreign or alien company, the  
3 commissioner may accept a valuation made, or caused to be made,  
4 by the insurance supervisory official of any State or other  
5 jurisdiction when the valuation complies with the minimum

7 otherwise unacceptable to the commissioner, the commissioner  
8 may engage a qualified actuary at the expense of the company

11 commissioner.

12 (e) Requirements.--Each actuarial opinion under this section  
13 shall be governed by the following:

1           (5) Except in cases of fraud or willful misconduct, a  
2 qualified actuary shall not be liable for damages to any  
3 person, other than the insurance company or fraternal benefit  
4 society and the commissioner, for any act, error, omission,

14       Where  $R_1$  is the lesser of R and .09,  $R_2$  is the greater of  
15 R and .09, R is the reference interest rate defined in  
16 this section and W is the weighting factor defined in

20 interest contracts valued on a change in fund basis that  
21 do not guarantee interest rates on considerations  
22 received more than 12 months beyond the valuation date,  
23 the factors shown in subparagraph (i) or derived in  
24 subparagraph (ii) shall be increased by .05 for plan

3 no cash settlement options and for guaranteed interest  
4 contracts with no cash settlement options, the guarantee

6 date of purchase to the date annuity benefits are  
7 scheduled to commence.

8 (v) Each plan type referenced in this paragraph  
9 shall be defined as follows:

28 or guaranteed interest contract.

29                   (II) A change in fund basis of valuation  
30 shall refer to a valuation basis under which the

1 interest rate used to determine the minimum  
2 valuation standard applicable to each change in  
3 the fund held under the annuity or guaranteed  
4 interest contract is the calendar year valuation  
5 interest rate for the year of the change in the  
6 fund.

29 calendar year of issue or purchase, of the monthly average of  
30 the composite yield on seasoned corporate bonds, as published

1 by Moody's Investors Service, Inc.

2 (4) For other annuities with cash settlement options and  
3 guaranteed interest contracts with cash settlement options,  
4 valued on a year of issue basis, except as stated in  
5 paragraph (2), with guarantee duration of 10 years or less,  
6 the average over a period of 12 months, ending on June 30 of  
7 the calendar year of issue or purchase, of the monthly  
8 average of the composite yield on seasoned corporate bonds,  
9 as published by Moody's Investors Service, Inc.

10 (5) For other annuities with no cash settlement options  
11 and for guaranteed interest contracts with no cash settlement  
12 options, the average over a period of 12 months, ending on  
13 June 30 of the calendar year of issue or purchase, of the  
14 monthly average of the composite yield on seasoned corporate  
15 bonds, as published by Moody's Investors Service, Inc.

16 (6) For other annuities with cash settlement options and  
17 guaranteed interest contracts with cash settlement options,  
18 valued on a change in fund basis, except as stated in  
19 paragraph (2), the average over a period of 12 months, ending  
20 on June 30 of the calendar year of the change in the fund, of  
21 the monthly average of the composite yield on seasoned  
22 corporate bonds, as published by Moody's Investors Service,  
23 Inc.

24 (e) Alternative method to determine reference interest  
25 rate.--If the monthly average of the composite yield on seasoned  
26 corporate bonds is no longer published by Moody's Investors  
27 Service, Inc. or if NAIC determines that the monthly average of  
28 the composite yield on seasoned corporate bonds as published by  
29 Moody's Investors Service, Inc. is no longer appropriate for the  
30 determination of the reference interest rate, then an

1 alternative method for determination of the reference interest  
2 rate adopted by NAIC and approved by regulation may be  
3 substituted.

4 § 7118. Reserve valuation method for life insurance and  
5 endowment benefits.

6 (a) Uniform insurance amount and premiums.--Except as  
7 otherwise provided in sections 7119 (relating to reserve  
8 valuation method for annuity and pure endowment benefits), 7122  
9 (relating to reserve calculation for valuation net premium  
10 exceeding gross premium charged) and 7124 (relating to minimum  
11 standard for accident and health insurance contracts), for the  
12 life insurance and endowment benefits of policies providing for  
13 a uniform amount of insurance and requiring the payment of  
14 uniform premiums, reserves according to the commissioners  
15 reserve valuation method shall be the excess, if any, of the  
16 present value, at the date of valuation, of the future  
17 guaranteed benefits provided for by those policies, over the  
18 then present value of any future modified net premiums therefor.  
19 The modified net premiums for a policy shall be the uniform  
20 percentage of the respective gross premiums for the benefits so  
21 that the present value, at the date of issue of the policy, of  
22 all modified net premiums shall be equal to the sum of the then  
23 present value of the benefits provided for by the policy and the  
24 excess of paragraph (1) over paragraph (2), as follows:

25 (1) A net level annual premium equal to the present  
26 value, at the date of issue, of the benefits provided for  
27 after the first policy year, divided by the present value, at  
28 the date of issue, of an annuity of one per year payable on  
29 the first and each subsequent anniversary of the policy on  
30 which a premium falls due. However, the net level annual

1 premium shall not exceed the net level annual premium on the  
2 19-year premium whole life plan for insurance of the same  
3 amount at an age one year greater than the age at issue of  
4 the policy.

5 (2) A net one-year term premium for the benefits  
6 provided for in the first policy year.

7 (b) First-year excess.--For a life insurance policy issued  
8 on or after January 1, 1985, for which the gross premium in the  
9 first policy year exceeds that of the second year and for which  
10 no comparable additional benefit is provided in the first year  
11 for the excess and which provides an endowment benefit or a cash  
12 surrender value or a combination in an amount greater than the  
13 excess premium, reserves according to the commissioners reserve  
14 valuation method as of any policy anniversary occurring on or  
15 before the assumed ending date defined under this subsection as  
16 the first policy anniversary on which the sum of any endowment  
17 benefit and any cash surrender value then available is greater  
18 than the excess premium shall, except as otherwise provided in  
19 section 7122, be the greater of the reserve as of the policy  
20 anniversary calculated as described in subsection (a) and the  
21 reserve as of the policy anniversary calculated as described in  
22 subsection (a), but with:

23 (1) The value defined in subsection (a) being reduced by  
24 15% of the amount of this excess first year premium.

25 (2) All present values of benefits and premiums being  
26 determined without reference to premiums or benefits provided  
27 for by the policy after the assumed ending date.

28 (3) The policy being assumed to mature on that date as  
29 an endowment.

30 (4) The cash surrender value provided on that date being

1 considered as an endowment benefit.  
2 In making the comparison under this subsection, the mortality  
3 and interest bases stated in sections 7115 (relating to  
4 computation of minimum standard) and 7117 (relating to  
5 computation of minimum standard by calendar year of issue) shall  
6 be used.

7 (c) Consistent method.--Reserves according to the  
8 commissioners reserve valuation method shall be calculated by a  
9 method consistent with the principles of this section, except  
10 that any extra premiums charged because of impairments or  
11 special hazards shall be disregarded in the determination of  
12 modified net premiums, for:

13 (1) Life insurance policies providing for a varying  
14 amount of insurance or requiring the payment of varying  
15 premiums.

16 (2) Group annuity and pure endowment contracts purchased  
17 under a retirement plan or plan of deferred compensation,  
18 established or maintained by an employer, including a  
19 partnership or sole proprietorship, or by an employee  
20 organization, or by both, other than a plan providing  
21 individual retirement accounts or individual retirement  
22 annuities under section 408 of the Internal Revenue Code of  
23 1986 (Public Law 99-514, 26 U.S.C. § 408).

24 (3) Disability and accidental death benefits in all  
25 policies and contracts.

26 (4) All other benefits, except life insurance and  
27 endowment benefits in life insurance policies and benefits  
28 provided by all other annuity and pure endowment contracts.

29 § 7119. Reserve valuation method for annuity and pure endowment  
30 benefits.

1 (a) Applicability.--This section shall apply to all annuity  
2 and pure endowment contracts other than group annuity and pure  
3 endowment contracts purchased under a retirement plan or plan of  
4 deferred compensation, established or maintained by an employer,  
5 including a partnership or sole proprietorship, or by an  
6 employee organization, or by both, other than a plan providing  
7 individual retirement accounts or individual retirement  
8 annuities under section 408 of the Internal Revenue Code of 1986  
9 (Public Law 99-514, 26 U.S.C. § 408).

10 (b) Calculation.--The following shall apply:

11 (1) Reserves according to the commissioners annuity  
12 reserve method for benefits under annuity or pure endowment  
13 contracts, excluding any disability and accidental death  
14 benefits in the contracts, shall be the greatest of the  
15 respective excesses of the present values, at the date of  
16 valuation, of the future guaranteed benefits, including  
17 guaranteed nonforfeiture benefits, provided for by the  
18 contracts at the end of each respective contract year, over  
19 the present value, at the date of valuation, of any future  
20 valuation considerations derived from future gross  
21 considerations, required by the terms of the contract, that  
22 become payable prior to the end of the respective contract  
23 year.

24 (2) The future guaranteed benefits shall be determined  
25 by using the mortality table, if any, and the interest rate  
26 or rates specified in the contracts for determining  
27 guaranteed benefits.

28 (3) The valuation considerations shall be the portions  
29 of the respective gross considerations applied under the  
30 terms of the contracts to determine nonforfeiture values.

1 § 7120. Minimum reserves.

2 (a) Amount calculated.--A company's aggregate reserves for  
3 all life insurance policies, excluding disability and accidental  
4 death benefits, issued on or after May 17, 1921, shall not be  
5 less than the aggregate reserves calculated by using the  
6 mortality table or tables and rate or rates of interest used in  
7 calculating nonforfeiture benefits for the policies and in  
8 accordance with the methods set forth in:

9 (1) Section 7118 (relating to reserve valuation method  
10 for life insurance and endowment benefits).

11 (2) Section 7119 (relating to reserve valuation method  
12 for annuity and pure endowment benefits).

13 (3) Section 7122 (relating to reserve calculation for  
14 valuation net premium exceeding gross premium charged).

15 (4) Section 7123 (relating to reserve calculation for  
16 indeterminate premium plans).

17 (b) Amount necessary to render actuarial opinion.--The  
18 aggregate reserves for all policies, contracts and benefits  
19 shall not be less than the aggregate reserves determined by the  
20 appointed actuary to be necessary to render the opinion required  
21 by section 7113 (relating to actuarial opinion of reserves prior  
22 to operative date of valuation manual) or 7114 (relating to  
23 actuarial opinion of reserves on or after operative date of  
24 valuation manual).

25 § 7121. Optional reserve calculation.

26 (a) Issuance prior to May 17, 1921.--Reserves for policies  
27 and contracts issued prior to May 17, 1921, may be calculated,  
28 at the option of the company, according to any standards that  
29 produce greater aggregate reserves for all these policies and  
30 contracts than the minimum reserves required by law.

1 (b) Issuance on or after May 17, 1921.--Reserves for any  
2 category of policies, contracts or benefits established by the  
3 commissioner, issued on or after May 17, 1921, may be  
4 calculated, at the option of the company, according to any  
5 standards that produce greater aggregate reserves for the  
6 category than those calculated according to the minimum standard  
7 provided under this chapter, but the rate or rates of interest  
8 used for policies and contracts, other than annuity and pure  
9 endowment contracts, shall not be greater than the corresponding  
10 rate or rates of interest used in calculating any nonforfeiture  
11 benefits provided in the policies or contracts.

12 (c) Adoption of alternative standards.--The following shall  
13 apply:

14 (1) Subject to paragraph (2), a company that adopts at  
15 any time a standard of valuation producing greater aggregate  
16 reserves than those calculated according to the minimum  
17 standard provided under this chapter may adopt a lower  
18 standard of valuation with the approval of the commissioner,  
19 but not lower than the minimum provided in this chapter.

20 (2) For the purposes of this section, the holding of  
21 additional reserves previously determined by the appointed  
22 actuary to be necessary to render the opinion required by  
23 section 7113 (relating to actuarial opinion of reserves prior  
24 to operative date of valuation manual) or 7114 (relating to  
25 actuarial opinion of reserves on or after operative date of  
26 valuation manual) shall not be deemed to be the adoption of a  
27 higher standard of valuation.

28 § 7122. Reserve calculation for valuation net premium exceeding  
29 gross premium charged.

30 (a) Calculation of minimum reserve.--The following shall

1 apply:

2 (1) If in any contract year the gross premium charged by  
3 a company on a policy or contract is less than the valuation  
4 net premium for the policy or contract calculated by the  
5 method used in calculating the reserve but using the minimum  
6 valuation standards of mortality and rate of interest, the  
7 minimum reserve required for the policy or contract shall be  
8 the greater of:

9 (i) The reserve calculated according to the  
10 mortality table, rate of interest and method actually  
11 used for the policy or contract.

12 (ii) The reserve calculated by the method actually  
13 used for the policy or contract but using the minimum  
14 valuation standards of mortality and rate of interest and  
15 replacing the valuation net premium by the actual gross  
16 premium in each contract year for which the valuation net  
17 premium exceeds the actual gross premium.

18 (2) The minimum valuation standards of mortality and  
19 rate of interest referred to in this subsection are those  
20 standards stated in sections 7115 (relating to computation of  
21 minimum standard) and 7117 (relating to computation of  
22 minimum standard by calendar year of issue).

23 (b) How to apply this section for certain policies.--The  
24 following shall apply:

25 (1) For a life insurance policy issued on or after  
26 January 1, 1985, for which the gross premium in the first  
27 policy year exceeds that of the second year and for which no  
28 comparable additional benefit is provided in the first year  
29 for the excess and which provides an endowment benefit or a  
30 cash surrender value or a combination in an amount greater

1 than the excess premium, the provisions of this section shall  
2 be applied as if the method actually used in calculating the  
3 reserve for the policy were the method described in section  
4 7118 (relating to reserve valuation method for life insurance  
5 and endowment benefits), ignoring section 7118(b).

6 (2) The minimum reserve at each policy anniversary of  
7 the policy under paragraph (1) shall be the greater of the  
8 minimum reserve calculated in accordance with section 7118,  
9 including section 7118(b), and the minimum reserve calculated  
10 in accordance with this section.

11 § 7123. Reserve calculation for indeterminate premium plans.

12 (a) Applicability.--This section shall apply to either of  
13 the following:

14 (1) A plan of life insurance that provides for future  
15 premium determination, the amounts of which are to be  
16 determined by the insurance company based on then estimates  
17 of future experience.

18 (2) A plan of life insurance or annuity that is of a  
19 nature that the minimum reserves cannot be determined by the  
20 methods described in any of the following:

21 (i) Section 7118 (relating to reserve valuation  
22 method for life insurance and endowment benefits).

23 (ii) Section 7119 (relating to reserve valuation  
24 method for annuity and pure endowment benefits).

25 (iii) Section 7122 (relating to reserve calculation  
26 for valuation net premium exceeding gross premium  
27 charged).

28 (b) Nature and calculation of reserves.--The reserves that  
29 are held under a plan under this section shall be:

30 (1) Appropriate in relation to the benefits and the

1 pattern of premiums for the plan.

2 (2) Computed by a method that is consistent with the  
3 principles of this chapter, as determined by regulation.

4 § 7124. Minimum standard for accident and health insurance  
5 contracts.

6 (a) Annual valuation of reserve liabilities.--On an annual  
7 basis as of the December 31 of the preceding year, the  
8 commissioner shall value, or cause to be valued, or require the  
9 insurer to value, or cause to be valued, the reserve liabilities  
10 of each company doing business in this Commonwealth, with  
11 respect to all the accident and health insurance contracts of  
12 the company.

13 (b) Issuances after operative date of valuation manual.--For  
14 accident and health insurance contracts issued on or after the  
15 operative date of the valuation manual, the standard prescribed  
16 in the valuation manual shall be the minimum standard of  
17 valuation required under section 7112 (relating to reserve  
18 valuation for policies and contracts issued on or after  
19 operative date of valuation manual).

20 (c) Issuances prior to operative date of valuation manual.--  
21 For accident and health insurance contracts issued on or after  
22 May 17, 1921, and prior to the operative date of the valuation  
23 manual, the following shall apply:

24 (1) The minimum standard of valuation shall be the  
25 standard adopted by the commissioner by regulation.

26 (2) The company shall maintain a claim reserve for  
27 incurred but unpaid claims and an active life reserve that  
28 shall:

29 (i) place a sound value on its liabilities under  
30 these contracts; and

1           (ii) be not less than the reserve according to  
2           appropriate standards as prescribed by regulation.

3           (3) The active life reserve shall not be less in the  
4           aggregate than the pro rata gross unearned premiums for the  
5           contracts.

6           (d) Foreign or alien insurers.--For a foreign or alien  
7           insurer, the commissioner may accept a like valuation of the  
8           insurance supervising official of the state, province or foreign  
9           country in which that insurer is domiciled, if that valuation is  
10           made upon a basis and according to standards producing an  
11           aggregate reserve not less than contained in this chapter.

12           (e) Applicability.--This section shall not apply to total  
13           and permanent disability benefits supplementary to life  
14           insurance or annuity policies or contracts.

15           § 7125. Valuation manual for policies issued on or after  
16           operative date of valuation manual.

17           (a) Standard in valuation manual.--Except as provided in  
18           subsection (c) or (e), for policies issued on or after the  
19           operative date of the valuation manual, the standard prescribed  
20           in the valuation manual shall be the minimum standard of  
21           valuation required under 7112 (relating to reserve valuation for  
22           policies and contracts issued on or after operative date of  
23           valuation manual).

24           (b) Specific information in valuation manual.--The valuation  
25           manual shall specify:

26           (1) Minimum valuation standards for and definitions of  
27           the policies or contracts subject to section 7112, which  
28           shall be:

29           (i) The commissioners reserve valuation method for  
30           life insurance contracts other than annuity contracts.

1           (ii) The commissioners annuity reserve valuation  
2 method for annuity contracts.

3           (iii) Minimum reserves for all other policies or  
4 contracts.

5           (2) Which policies or contracts or types of policies or  
6 contracts are subject to the requirements of a principle-  
7 based valuation in section 7126(a) (relating to requirements  
8 of principle-based valuation) and the minimum valuation  
9 standards consistent with those requirements.

10           (3) For policies and contracts subject to a principle-  
11 based valuation under section 7126:

12           (i) Requirements for the format of reports to the  
13 commissioner under section 7126(b) (3), including  
14 information necessary to determine if the valuation is  
15 appropriate and in compliance with this chapter.

16           (ii) Assumptions prescribed for risks over which the  
17 company does not have significant control or influence.

18           (iii) Procedures for corporate governance and  
19 oversight of the actuarial function and a process for  
20 appropriate waiver or modification of those procedures.

21           (4) For policies not subject to a principle-based  
22 valuation under section 7126, the minimum valuation standard,  
23 which shall:

24           (i) be consistent with the minimum standard of  
25 valuation prior to the operative date of the valuation  
26 manual; or

27           (ii) develop reserves that quantify the benefits,  
28 guarantees and the funding associated with the contracts  
29 and their risks at a level of conservatism that reflects  
30 conditions that include unfavorable events having a

1 reasonable probability of occurring.

2 (5) Other requirements, including those relating to  
3 reserve methods, models for measuring risk, generation of  
4 economic scenarios, assumptions, margins, use of company  
5 experience, risk measurement, disclosure, certifications,  
6 reports, actuarial opinions and memorandums, transition rules  
7 and internal controls.

8 (6) The data and form of the data required under section  
9 7127 (relating to experience reporting for policies in force  
10 on or after operative date of valuation manual) and with whom  
11 the data must be submitted. The valuation manual may specify  
12 other requirements, including data analyses and reporting of  
13 analyses.

14 (c) Absent or noncompliant valuation requirement.--In the  
15 absence of a specific valuation requirement or if a specific  
16 valuation requirement in the valuation manual is not, in the  
17 opinion of the commissioner, in compliance with this chapter,  
18 the company shall, with respect to those requirements, comply  
19 with minimum valuation standards prescribed by the commissioner  
20 by regulation.

21 (d) Actuarial examination and review.--The following shall  
22 apply:

23 (1) The commissioner may engage a qualified actuary, at  
24 the expense of a company, to:

25 (i) perform an actuarial examination of the company  
26 and opine on the appropriateness of any reserve  
27 assumption or method used by the company; or

28 (ii) review and opine on the company's compliance  
29 with any requirement under this chapter.

30 (2) The commissioner may rely on the opinion regarding

1 provisions contained in this chapter of a qualified actuary  
2 engaged by the commissioner of another state, district or  
3 territory of the United States.

4 (3) As used in this subsection, the term "engage" shall  
5 include employment and contracting.

6 (e) Change, adjustment and disciplinary action.--The  
7 commissioner may require a company to change any assumption or  
8 method or adjust company reserves if, in the opinion of the  
9 commissioner, the change or adjustment is necessary to comply  
10 with the requirements of the valuation manual or this chapter.  
11 The commissioner may take disciplinary action as permitted by  
12 law.

13 § 7126. Requirements of principle-based valuation.

14 (a) Characteristics of valuation.--For policies or contracts  
15 specified in the valuation manual, a company shall establish  
16 reserves using a principle-based valuation that:

17 (1) Quantifies benefits and guarantees and the funding  
18 associated with contracts and their risks at a level of  
19 conservatism that reflects conditions that include  
20 unfavorable events having a reasonable probability of  
21 occurring during the lifetime of the contracts. For policies  
22 or contracts with significant tail risk, the valuation must  
23 reflect conditions appropriately adverse to quantify the tail  
24 risk.

25 (2) Incorporates assumptions, risk analysis methods and  
26 financial models and management techniques that are  
27 consistent with, but not necessarily identical to, those  
28 utilized within the company's overall risk assessment  
29 process, while recognizing potential differences in financial  
30 reporting structures and any prescribed assumptions or

1 methods.

2 (3) Incorporates assumptions that are:

3 (i) Prescribed in the valuation manual.

4 (ii) If not prescribed in the valuation manual,  
5 established by utilizing either of the following:

6 (A) The company's available experience, to the  
7 extent it is relevant and statistically credible.

8 (B) Other relevant and statistically credible  
9 experience, to the extent that company data is not  
10 available, relevant or statistically credible.

11 (4) Provides margins for uncertainty, including adverse  
12 deviation and estimation error, so that the greater the  
13 uncertainty, the larger the margin and resulting reserve.

14 (b) Company requirements.--A company using a principle-based  
15 valuation for one or more policies or contracts subject to this  
16 section as specified in the valuation manual shall:

17 (1) Establish procedures for corporate governance and  
18 oversight of the actuarial valuation function consistent with  
19 those described in the valuation manual.

20 (2) Provide to the commissioner and the board of  
21 directors an annual certification of the effectiveness of the  
22 internal controls with respect to the principle-based  
23 valuation. These controls shall be designed to assure that  
24 all material risks inherent in the liabilities and associated  
25 assets subject to this valuation are included in the  
26 valuation and that valuations are made in accordance with the  
27 valuation manual. The certification shall be based on the  
28 controls in place as of the end of the preceding calendar  
29 year.

30 (3) Develop and file with the commissioner upon request

1 a principle-based valuation report that complies with  
2 standards prescribed in the valuation manual.  
3 (c) Formulaic reserve component.--A principle-based  
4 valuation may include a prescribed formulaic reserve component.  
5 § 7127. Experience reporting for policies in force on or after  
6 operative date of valuation manual.

7 A company shall submit to the commissioner, or the  
8 commissioner's designee or agent, mortality, morbidity,  
9 policyholder behavior or expense experience and other data as  
10 prescribed in the valuation manual.
